## *Keeping Your Home Clean Amidst the Coronavirus*

**THERE IS NOTHING BETTER THAN ACTUAL CLEANING.**

It is proven that washing your hands with soap and warm water is more effective in killing the coronavirus than using hand sanitizers. So, cleaning your floor surfaces is better than any chemical used.

***For soft surfaces like carpet and upholstery, this will be your 1st weapon of attack - CLEANING.***

For peace of mind, we are able to provide a **post-spray sanitizer that is EPA approved**. Please note: There is no sanitizer made for soft surfaces. But, you can apply them as an extra precaution after cleaning. We **DO NOT GUARANTEE** or make any sanitizing claims as that would be misleading.

**CLEAN YOUR HARD SURFACE FLOORING AS WELL - Don't forget we clean Tile, Wood Floors, PVC, Laminate, etc.** [View pictures here.](#)

**We offer OZONE SHOCK TREATMENTS.** [A medical journal on February 5, 2020](#) stated, "In order to be safe, as we still do not really know how long this **coronavirus** can survive on surfaces, it's best to disinfect areas that have lots of contact with people whether or not they are showing signs of having been infected or not.

One good way to do that is by deploying **OZONE GAS**.

Ozone gas has been proven to kill the SARS **coronavirus** ...it is relatively safe to say that it will also work on the new coronavirus though it must be noted that there are no studies to date except one that is currently ongoing in China at the Institute of Virology..."

Transporting someone to the doctor? Then, **OZONE YOUR VEHICLE!** What is Ozone? [Read More.](#)

Everyone please stay healthy and safe during these difficult times!
